PROJECTS

Food Ordering System
- Developed a robust and user-friendly Food Ordering System using Java Swing, aimed at enhancing the efficiency of restaurant operations and streamlining the ordering process.

Cafe Website
- Developed a cafe website using HTML,CSS . The website aimed to be visually appealing and user-friendly, showcased cafe's unique atmosphere and services, featured a menu, descriptions, pricing, high-quality images and reservation forms.

Travel Package Management System
- Developed a travel package management system using HTML, CSS, PHP for enabling users to sign up, login and book packages.

Cloth Material Identifier
- Collaborated in a team of four to create a Cloth Material Identifier, an innovative website that utilizes Convolutional Neural Networks (CNN) for accurate and rapid material classification. The project aimed to assist users in identifying various fabrics like Cotton, Silk and Woolen, enhancing their shopping experience and textile knowledge.
